

1. Show the LR(0) automaton for the grammar given below:

$s \rightarrow a c$

$a \rightarrow \text{int var_dec} \mid \epsilon \mid \text{float var_dec}$

$\text{var_dec} \rightarrow \text{id}$

$c \rightarrow \text{void id} (a) \mid \epsilon$

1. Show the LR(0) automaton for the grammar given below:

$\text{expr} \rightarrow \text{while}(\text{cond}) \mid \text{epsilon} \mid \text{decl}$

$\text{cond} \rightarrow \text{var op var c}$

$\text{decl} \rightarrow \text{char C}$

$C \rightarrow \text{var}$

1. Show the LR(0) automaton for the grammar given below:

$S \rightarrow SSS+ \mid SS* \mid a \mid == \mid e$

1. Show the LR(0) automaton for the grammar given below:

$p_t \rightarrow \text{record} \{ \text{def} \} \mid \epsilon$

$\text{def} \rightarrow \text{def def def} \mid \text{type name}$

$\text{type} \rightarrow c \mid i \mid f$
